Disability Profiling and Monitoring Application

Mobile Innovation

Disability Profiling And Monitoring

Tool is for identification and creation of profile of the disabled in the locality. It captures the details of the health condition of the disabled with the details of assistance required by the disabled & monitors the details of the assistance provided to the disabled.

Cost Effective & Scalable Solution

Implemented accross India

The Intervention Achieves Three Broad Objectives

Empower local communities to hold local governments to account for delivery of basic services including infrastructure creation.

Build the capacity of local interlocutors including community organizations, business chambers & Community Development Officers (CDOs), to collect & report citizen feedback on critical health service.

Build capacities of decision makers to use real-time data generated by the mobile applications for focused,responsive and time lyactions.
