Building Platform

Mobile Innovation ICT For Green Growth

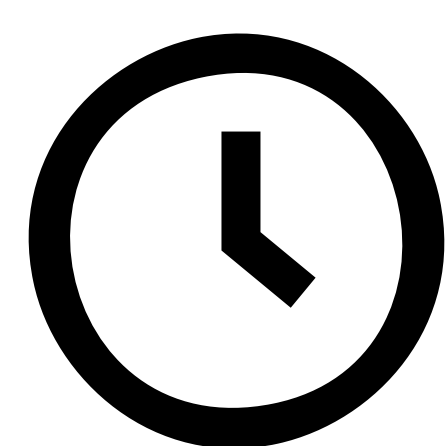

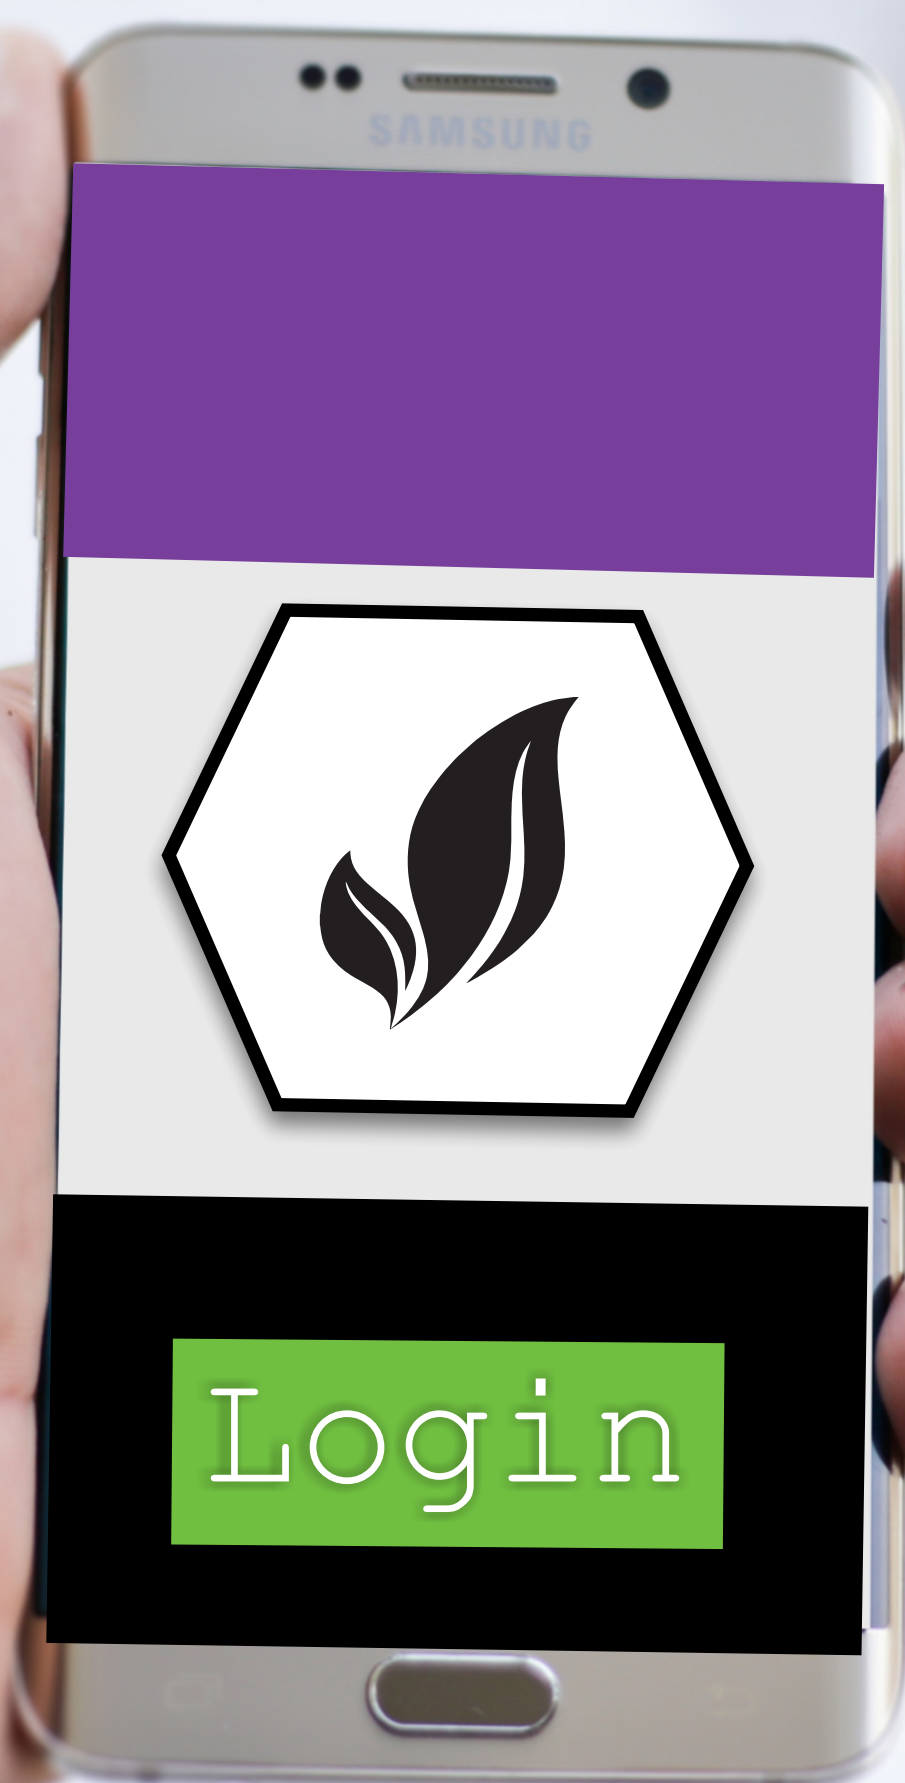

It is a VIRTUAL Knowledge Management and Capacity Building Platform for **SMART CITY SOLUTIONS.**

Identification, categorization and manipulation of knowledge resources, used of Knowledge sharing and provide personalized Content for smart city practitioners.

Implemented accross India

Cost
Effective
& Scalable
Solution

Why is it Needed?

Monitoring

Monitoring at all levels and usage of the systems and reports is vital as it is key to optimal resource planning in terms of inventory maintenance of drugs and infrastructure facilities.

Report generation

Schedules and automatic report generation results in considerable timesaving for the Auxiliary Nurse Midwife (ANMs), which could be utilized for providing better service.

Database

Use of common citizen database can facilitate other Government Departments as well.

Objective:

1

Mainstreaming the knowledge exchange activities as an integral part of the learning and capacity building programs across the government agencies and private partners (SPVs) in selected and aspiring Smart Cities in India and connecting them with their counter parts globally.

2

Establishing institutional framework for systematic knowledge management, sharing and transfer among the participating agencies

3

Enable Smart City practitioners to access a range of knowledge documents, technology trends, idea notes and case studies to be able to apply this knowledge in the delivery of their functions, roles and responsibilities

4

Replicate Global Smart Cities Good practices in India by setting up a peer exchange network. Korean practitioners (Phase I) and other smart city practitioners across the globe (Phase II)

5

Undertake face to face interactions through knowledge exchange study tours, workshops and technical boot camps based upon demand of Indian practitioners.

A Smart Cities Knowledge System Enabling:

1 Collaboration
(Via communities, blogs and forums)

2 Finding People
(agencies, experts, businesses, academia, civil society) that work with green growth smart cities solutions

3 Finding Cities
(Indian, Korean, and in the future others) working with smartcities.

4 A Document Library
(agencies, experts, businesses, academia, civil society) that work with green growth smart cities solutions

5 Showing Case Studies

6 All structured around a methodological hierarchy (Knowledge Map)
